

"Mihalaki Georgiev" Regional Library

Books in search of (more) readers

With a predominantly elderly population, in addition to borrowing fiction, literature related to health prevention, financial literacy, agriculture, as well as information campaigns and training on media literacy, elementary computer literacy and the Internet, etc.

In the presence of young people, children, kindergartens and schools, the accompanying activities are aimed at stimulating and nurturing a love of reading, supporting personal development, overcoming illiteracy, as well as increasing the functional and information literacy of the population.

We organize excursions in the Danube Park under the motto
"Books story tell us".

By traveling with the Bibliobus, we tell the stories preserved on the pages of the books of all the sights, monuments and interesting places we pass through.

When and by whom were they built, who inspired the idea of putting them there, what was their purpose in the past and how can we preserve them for the future.

We visit children in kindergartens and schools. We talk about the library and our activities. We also talk about how important it is to read and love books. We play theater with the help of our volunteers, who, through their artistic talent, convey positive emotions to children. And then the children browse the books in the library bus and take them home.

Thank you for your attention!
